

Liberty Christian School

DEEP DECK, "R" PANEL

PROJECT DETAILS

- Panel: Deep Deck, "R" Panel
- Color: Sierra Tan
- Architect: F-J L-C & Associates
- General Contractor: Joeris General Contractors
- Installer: Roof Management Services

Liberty Christian School was founded in 1983 by Dr. Rodney and Judy Haire with the vision of providing a preparatory school in a Christian environment thus providing an excellent education with a strong biblical emphasis. Originally located in Denton, Texas, the school was moved to Argyle, Texas, in 2005. Berridge Manufacturing Company's Deep Deck Panel and "R" Panel were used in the light, neutral color choice of Sierra Tan on the exterior of the building. Ideal for East Texas weather, both panels are UL-90 wind resistance rated and UL-790 fire-resistance rated.

Joeris General Contractors and Roofing Management Services installed the Deep Deck Panel horizontally along the outside walls, while the "R" Panel was installed vertically on the walls above them. This new larger school now serves 1,300 students and is built to accommodate the rapidly growing school while providing them with a maintenance free building for years to come.
